

I am a Speck with a Big Big God
Francis Chan

I want you to have a high view of God. Today we will explore the concept of how the heavens declare His glory. How high, how holy? I prayed for the church that would expand how God is so huge. Open your eyes to see how valuable God is.

Psalm 73, last week, looks at the rich and is frustrated that they ignore God and are still blessed. The psalmist asked, "Why should I follow you?" Then he resolves that he is at peace, content with no one else.

People said "I want that, but how do I get there?"

I say "Pray." You don't have the power to love God on our own. "Help me love you today."

If I increase the value of someone or something-then your desire will be increase.

Psalm 8:1-4

You've ordained from the lips of children, sucklings, children who are breastfed. We have two infants praising God. The word "praise" means "strength." Jesus quotes this in Matthew 21-Children said "Hosanna" the leaders are angry "how are you letting the kids do this?" Jesus quotes this verse.

Praise silences the foe & avenger. The Enemy is Satan. The idea is-How does a child's praise silence the Devil?

If God is so powerful, why didn't He destroy the Devil? Why is He waiting until the endtime. Why is He alive and well today. What would bring God glory? When Satan was given time to tempt us as God's children, and to let us choose to serve God.

That silences him. Remember Satan tempting Christ-bread, worship, jump off the temple? No thanks, I choose God. That brings Him glory.

Verse three-"When I consider the heavens, the moon the stars-what is man, that you are mindful of Him?" Many of you know I am fascinated by the stars. I have been absolutely floored about our solar system. Our video of what we would look like if we pulled away the solar system. Here's the earth, 100 kilometers, 100,000 kil. Past the moon. Ten trillion kilometers, ten light years away, 100 million light years away. Our telescopes can't see anymore. Time and space are actually curved.

The shape of the Milky Way is like a pancake with a bulge in it. Yesterday, I made this replica at breakfast. The speed of light 186,000 miles per second. That's fast! A light year is traveling that in a whole year. Do you know how long it would take to get to the edge

of our galaxy? 100,000 light years. In the first fraction of a second you wouldn't see our earth. In the last galaxies, 350 billion galaxies, and we're here on this tiny ball.

Are you fascinated by this, and yet God created me. People will walk in here and think they are big. Psalm 19 says the heavens declare the glory of God. God says the creation speaks for itself.

Here's another video-I just want you to look. This video is you are pulling away from the earth. This is what we see along the way in the Hubble telescope. Allow God to speak to you. What's more significant to see the greatness of God.

Take a few minutes to say what you need to say to God. Picture yourself-past the moon, the sun, the galaxies....speak to him.

While we look at ourselves-God notices me and He hears our prayers. Are you seeing the value and worth of God. My whole identity is wrapped up in who He is. Makes you realize that "The only thing I need to do on this earth is to do is to worship Him."
